

## High Fidelity Prototyping Customer Notes

- 1) Colleen suggested we include a share button beside download.
- 2) Brooklyn suggested we add an SDG page on the web page where it has all the 17 SDGs that the UN are focusing as well (even though we only focusing on 6 for this project). They should also be presented in an interactive way.
- 3) Tim suggested to make the subcategory section also active on hover as opposed to on click, just to make it more intuitive.
- 4) Colleen was talking about something regarding “SDG Localization” which in short is the “How can we help?” section something which Alvin came up with in his lo-fi design.
- 5) Have some info on the homepage about what this website is about, what the SDGs are, the global initiative and Regina’s efforts.
