Customer Notes on Activity 2

- Liked the interactive wheel idea more than the carousel one.

- Don't want to focus on the volunteer section really.

- Static Data is good for this project.

- Like the idea of a sharable information.

- Having the ability to download data is also desirable.

- Really liked infographics idea (might be hard to do apparently?).

- Will have subcategories like myPeg but not too many.

- Want to have a search bar.

- Focus is on couple SDGs but it would be nice to have information on all of them.

- Don't really like the traditional style of navigation.

- Fine with providing the users with the raw data (apparently).

- Don't really care how we create the subcategories (tabs vs scrolling).

- Don't want anything that some one would have to maintain after (feeds, newsletter…).

- Having the references area is not a bad idea.
